

INTRODUCTION TO THE SCHEME

Nature Needs You!

Turn Your Garden into a Wildlife Haven

Did you know there are over 22 million private gardens in the UK? That's four times the size of all our National Nature Reserves combined! Imagine the impact if every single one was buzzing with life, full of birdsong, butterflies, and blooming wildflowers.

Whether it's a window box or a wild jungle, every patch counts. Across the country, people are transforming their gardens into mini ecosystems and now, Sheringham Town Council wants to celebrate those efforts! We're recognising local heroes who are helping nature thrive and inspiring others to do the same. Take part in the Sheringham Wildlife Garden Award Scheme and help make our town a shining example of what's possible when we garden with wildlife in mind.

Who can take part?

Have you got a Green Space? Entry is FREE and it's open to everyone doing their bit to support wildlife, no matter the size of your space. Whether you've got a garden big or small, an allotment, a balcony bursting with pots, or even a window box, you can help nature thrive! Schools, nurseries, care homes, businesses and community gardens as well... if you care for a green space in Sheringham, you qualify to enter this scheme.

How does the scheme work?

Remember entry is FREE and open to everyone doing their bit for nature in Sheringham. All you need to do is fill out our Gardening checklist, take some photos and send this information to us. Your garden will be assessed using our checklist and your photos, no visits required!

There are three Award Levels: Bronze, Silver & Gold. The more wildlife-friendly features you tick off (based on your garden size), the higher your award level and you will receive a certificate to recognise your efforts and a plaque to proudly display.

Let's turn Sheringham into a patchwork of wildlife havens—one garden at a time.
