

Keeping you in the loop ...

STREET LIGHTS

Our contractors are currently finishing off the removal and replacement of all our STC owned street lights.

The concrete columns are being swapped to galvanised steel and the lights are being changed to eco friendly dimmable LED lanterns.

Each new column will have a sticker attached clearly stating who to contact if/when you need to report an issue with the unit.

BENCHES

The Phase 1 replacement program of all STC owned benches has begun...

You will start to see old dilapidated benches being removed, the grounding made good and new benches being installed during July.

This wave includes the placement of a new bench dedicated to Sheringham Children's Home on Holway Road.

The new benches are made from recycled plastic including plastic bags, pots, bottles and other single use plastic which helps to support our Climate Action Plan.

CCTV

The replacement of all town CCTV cameras will be starting from Monday 17th July and will take a few weeks to complete.

Brand new, updated units will be installed in and around town and we will also be installing additional cameras at the play park (Cromer road) and at the Station Approach Putting Green.
