

Keeping you in the loop ...

THE CLOCK TOWER

Now that some critical electric works in the roof space have been completed, the Clock Tower is in full working order.

Over the next few months, we will also be giving the Tower some much deserved attention which will include works to the roof, roof slats, guttering and we will be painting the inside too.

THE TOWN CREST

Located in the town centre on Station Road in front of the Post Office, the wooden crest was commissioned by the Chamber of Trade to be made and installed in 1977.

STC now own the structure and will be looking to complete some restoration works on it as soon as we can.

It will be cleaned, repaired and restored back to its former glory.
